

Soft 75
Watts

4 Light Bulbs
From Bihar,
INDIA

(or
someplace
else)

To save energy costs,
find the bulbs with the
light output you need.
Then choose the bulb
with the lowest watts.

cut on dashed line

Soft 75
Watts

Boy, Bihar, INDIA.

This boy works in a factory
in Bihar, India, producing
lightbulbs. His job is to pull
bulbs from a spinning centri-
fuge. The factory is dimly
lit, and his work day lasts
12 hours, but his job
provides an income to his
family in one of the poor-
est regions of India,
and offers some security
against being sold into
servitude or sent away
to work producing bricks
or gravel.
